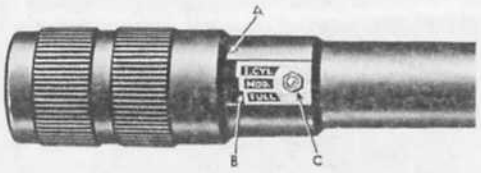
The **C-LECT-CHOKE** adjustment is instant and positive. Heretofore, the average shooter had the selection of buying guns with four different degrees of choke; the FULL CHOKE, for long range shooting of 40 yards or over; the MODIFIED, for medium range shooting from 30 to 35 yards; the IMPROVED CYLINDER, for close range shooting of 20 to 30 yards; and the FULL CYLINDER, for very close range shooting up to 20 yards. The **C-LECT-CHOKE** gives you the choice of these four degrees of choke plus any in between adjustment that may be desired.



To set the **C-LECT-CHOKE** for FULL CHOKE (FULL) turn the adjusting sleeve until the rear edge of the sleeve "A" touches the front edge of the line just ahead of the word "FULL" on the index plate "B". For MODIFIED (MOD) or IMPROVED CYLINDER (I. CYL.) settings turn the sleeve "A" to the lines ahead of these words on the index plate. The sleeve may be set to any of these chokes or to any point in between to obtain any degree of choke desired. To adjust to FULL CYLINDER BORE, which is for extra close shooting, turn the adjusting sleeve one full turn beyond IMPROVED CYLINDER. NEVER SHOOT THE GUN WITH THE CHOKE TURNED ANY FURTHER THAN CYLINDER BORE AND NEVER SHOOT THE GUN WITHOUT THE ADJUSTING SLEEVE IN PLACE. NEVER ADJUST CHOKE WHEN GUN IS LOADED.

Rifled slugs and buckshot can be used in the **C-LECT-CHOKE** at any setting. For best results we recommend that it be set at CYLINDER BORE.

For cleaning and oiling, the adustment sleeve can be removed by turning it all the way off the threads and pulling off.

Removing any accumulation of lead assures better patterns.

HOW TO MAKE YOUR OWN SETTINGS

If, for any reason, the index plate "B" is removed and you lose your setting, you will find underneath the index plate, a scratch mark which was put on at the factory. By turning the adjusting sleeve "A" up to this scratch mark, you automatically have a FULL CHOKE setting. You can then insert the index plate under the sleeve "A" until the FULL CHOKE line comes even to the edge of sleeve "A" and then put in and tighten sight "C".

10 COMMANDMENTS OF SHOOTING SAFETY

1. **TREAT EVERY GUN WITH THE RESPECT DUE A LOADED GUN.**
2. **WATCH THAT MUZZLE!** Carry your gun safely; keep safety on until ready to shoot.
3. **UNLOAD GUNS WHEN NOT IN USE,** take down or have actions open; guns should be carried in cases to shooting area.
4. **BE SURE BARREL IS CLEAR OF OBSTRUCTIONS,** and that you have ammunition only of the proper size for the gun you carry.

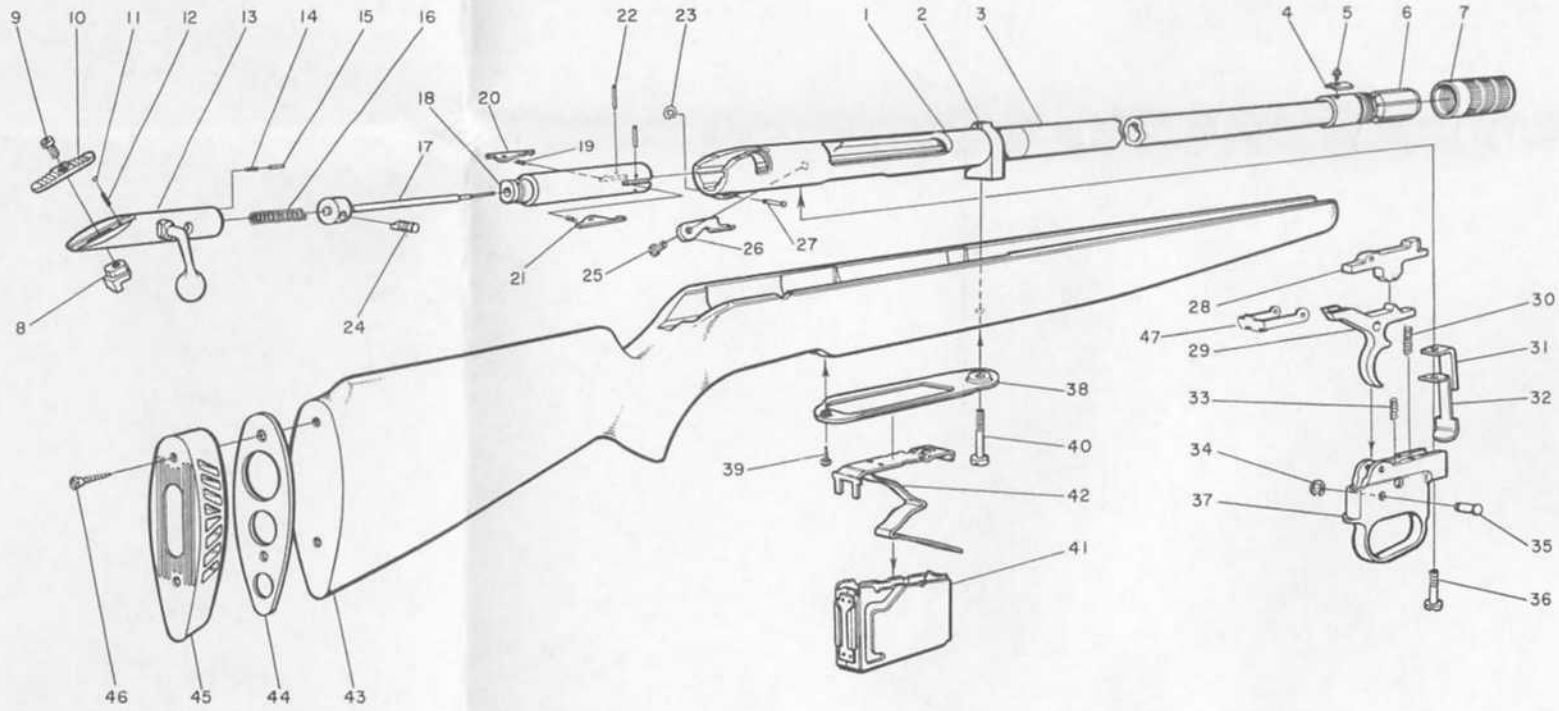
*Gun must be sent to the factory or to a competent gunsmith to have this part fitted.

Prices subject to change without notice.

No orders accepted under $1.00.

When ordering parts give the Part Number and the Model Number (as marked on the barrel).



1. **TO ASSEMBLE GUN** — Remove the magazine by pressing the magazine latch and sliding the magazine off. Fit the barrel and stock together with the trigger housing fitting in the corresponding hole in the stock. TIGHTEN THE TAKE DOWN SCREW in the stock SECURELY. Shooting the gun with this screw loose may result in the stock splitting.

2. **TO LOAD** — Put 2 shells in magazine and insert magazine, then raise bolt handle and open and close action. To load three shells, put 2 shells in the magazine, open the action and put one shell in the chamber, close the action, push the bolt handle down, insert the magazine. The gun is now ready to fire.

3. **SAFETY** — The safety button is located in the rear end of the bolt. To put on SAFE slide the safety button down to cover the red dot. To take off safe push the safety button up. When the RED DOT can be seen the gun is off safe, DANGER, the gun can be FIRED.

4. **AFTER GUN IS FIRED** — Pull bolt back as far as it will go. This ejects the old shell and cocks the gun. Then push the bolt forward and push bolt handle down. Gun is ready to fire again.

5. **AMMUNITION** — Any standard factory loaded 2¾" 16 gauge standard shells.

6. **TO REMOVE BOLT** — Open the action, hold back on the trigger and the bolt will slide out.

7. **TO DISASSEMBLE BOLT** — Depress the Bolt Index Plunger located in the slot in the side of the bolt. Turn the bolt one half turn and the bolt head will slide off.

8. **REAR SIGHT** — The rear sight on the receiver raises the sighting line to provide fast, accurate shooting — especially advantageous when shooting rifled slugs for deer and other big game.
